

Rotarians Tour Newly Constructed Luther Hospital Building November 29, 2010

(Thank you to Mary Knight, Development Director, for providing this article.)

On Monday, November 29, Rotarians gathered at the new hospital lobby on the Luther Midelfort, Mayo Health System downtown campus to tour the newly constructed Luther Building.

Highlights of the tour were redesigned patient rooms that are larger and can accommodate more technology as well as more room for family members, a new Cancer Center, a women's health floor that has special labor and delivery rooms with whirlpool tubs and well baby and special care nurseries, family and meditation rooms, and a new auditorium to be used for staff education as well as possible community use.

The tour ended with a walk through the domed Healing Garden and lunch in the Gold Conference Room.
